

Underprep

Datasheet

Klaas Underprep™ Primer/Sealer/Undercoat High Adhesion Acrylic

VOC <50g/Litre

DESCRIPTION

Underprep by Klaas Coatings is an ultra premium acrylic primer/sealer/undercoat for interior and exterior use.

Underprep has superior adhesion on most substrates including new and prepainted surfaces and is excellent in restoration work where a variety of substrates present themselves after stripping. Underprep saves time with no sanding required on most pre-painted applications including gloss enamels.

Underprep has excellent gloss hold out on both Decolife High Gloss Acrylic and Klaas Aquagloss when compared to traditional undercoats. Underprep can be overcoated in 1 hour @25°C & 50% relative humidity. Underprep will take 7 days to fully crosslink and reach maximum adhesion.

KEY BENEFITS

Superior Adhesion
Rapid Dry
1 Hour Recoat
No Sanding required over aged enamels
High Opacity
Excellent gloss hold-out

AREAS OF USE

Timber
Gyprock/Plasterboard
Concrete
Fibre Cement Sheeting
MDF
PVC
Galvanised Iron/Steel
Tiles

APPLICATION

	Method	Theoretical Coverage	Typical DFT	Touch Dry*	Re-Coat*
PRIMER					
Underprep	Roller, Brush & Spray	12m ² /L	25um	30 min	1 hours

* Figures nominated are measured at 25C & 50% RH. Drying times will be extended by reduced temperatures and increased relative humidity . Ambient temperature must not fall below 10°C during the drying period and RH must not exceed 85%.

Datasheet

COLOUR

White - Adhesion properties will decline in ratio with colourant addition.

PRODUCT INFORMATION

Finish	Clear
Density	1.4-1.5g/cm ³
VOC	<50g/L
Temperature Range*	10°C - 30°C
Clean Up	Water
Packaging	15 Litre Pail

WARRANTY

As part of Klaas System - 15 years against cracking, peeling & blistering where the product has been applied according to manufacturers displayed directions and in accordance with AS 2311, the painting of buildings.

NEW SURFACE PREPARATION

Surfaces to be painted must be clean, dry and free of contaminants, including dirt, grease, efflorescence, mould & mildew.

Allow new render, concrete to cure for a minimum of 28 days prior to application of Underprep prior to topcoating. Sand new timber prior to application of Underprep.

PREVIOUSLY PAINTED

Surfaces to be painted must be clean, dry and free of contaminants, including dirt, grease, efflorescence, mould & mildew.

Remove all peeling, cracking, loosely adhering material, sand smooth and dust down.

Repair any damaged area/s with appropriate fillers and prime using Klaas Underprep

SAFETY

Refer to Product Label and product MSDS 138-101
